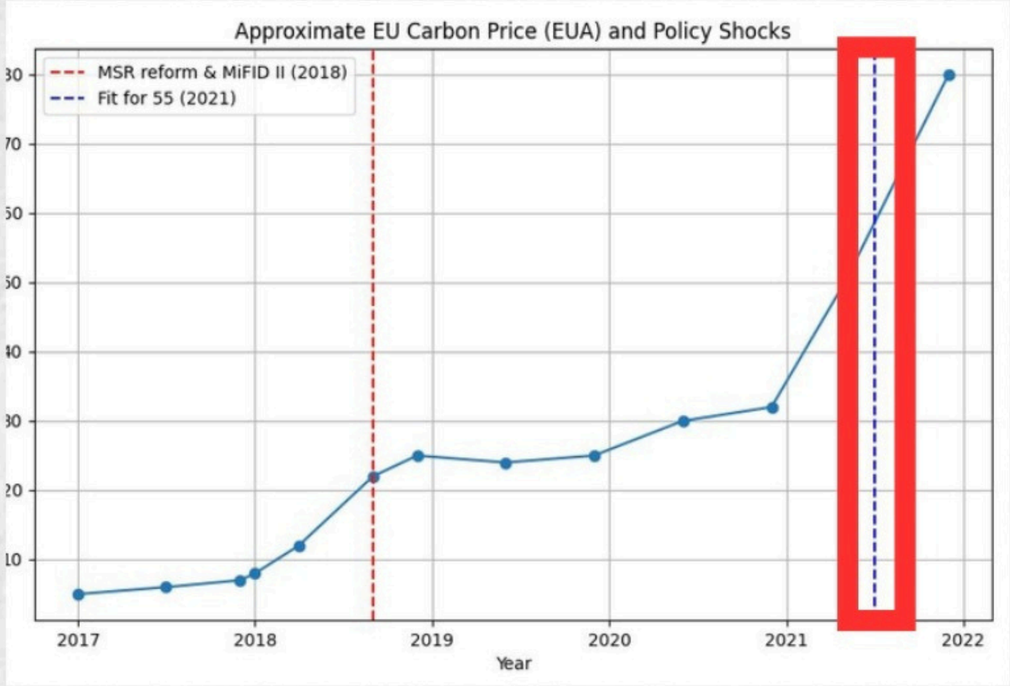
GLOBAL NEWS

14 JULY 2021

EUROPEAN - FIT FOR 55

The European Climate Law makes reaching the EU's climate goal of reducing EU emission by at least 55% by 2030 a legal obligation.



SINGAPORE NEWS

The carbon text was **raised** to **$25/tCO2e** with effect from **2024**.It will be raised to **$45/tCO2e** in **2026** and **2027** with a view to reaching **$50-80/tCO2e** by **2030**

Streamlined, Contagion-aware Carbon Risk Intelligence.
CQ2 Atlas maps policy contagion across countries, registries and project types to reveal systemic risk in your carbon portfolios.

Compliance-ready
Audit-grade reporting
Quantum-enabled
Why it matters
Policy shocks propagate like contagion
Host-country reversals, registry scandals, and Article 6 changes can cascade across interconnected markets. Atlas quantifies and visualizes these network effects so risk teams can act early.
Host-country reversals
Detect early warning signals from policy discourse and regulatory calendars.
Registry incidents
Stress test cross-registry contagion to avoid stranded or ineligible credits.
Article 6 rule changes
Model bilateral agreements and ITMO dynamics into your portfolio risk.

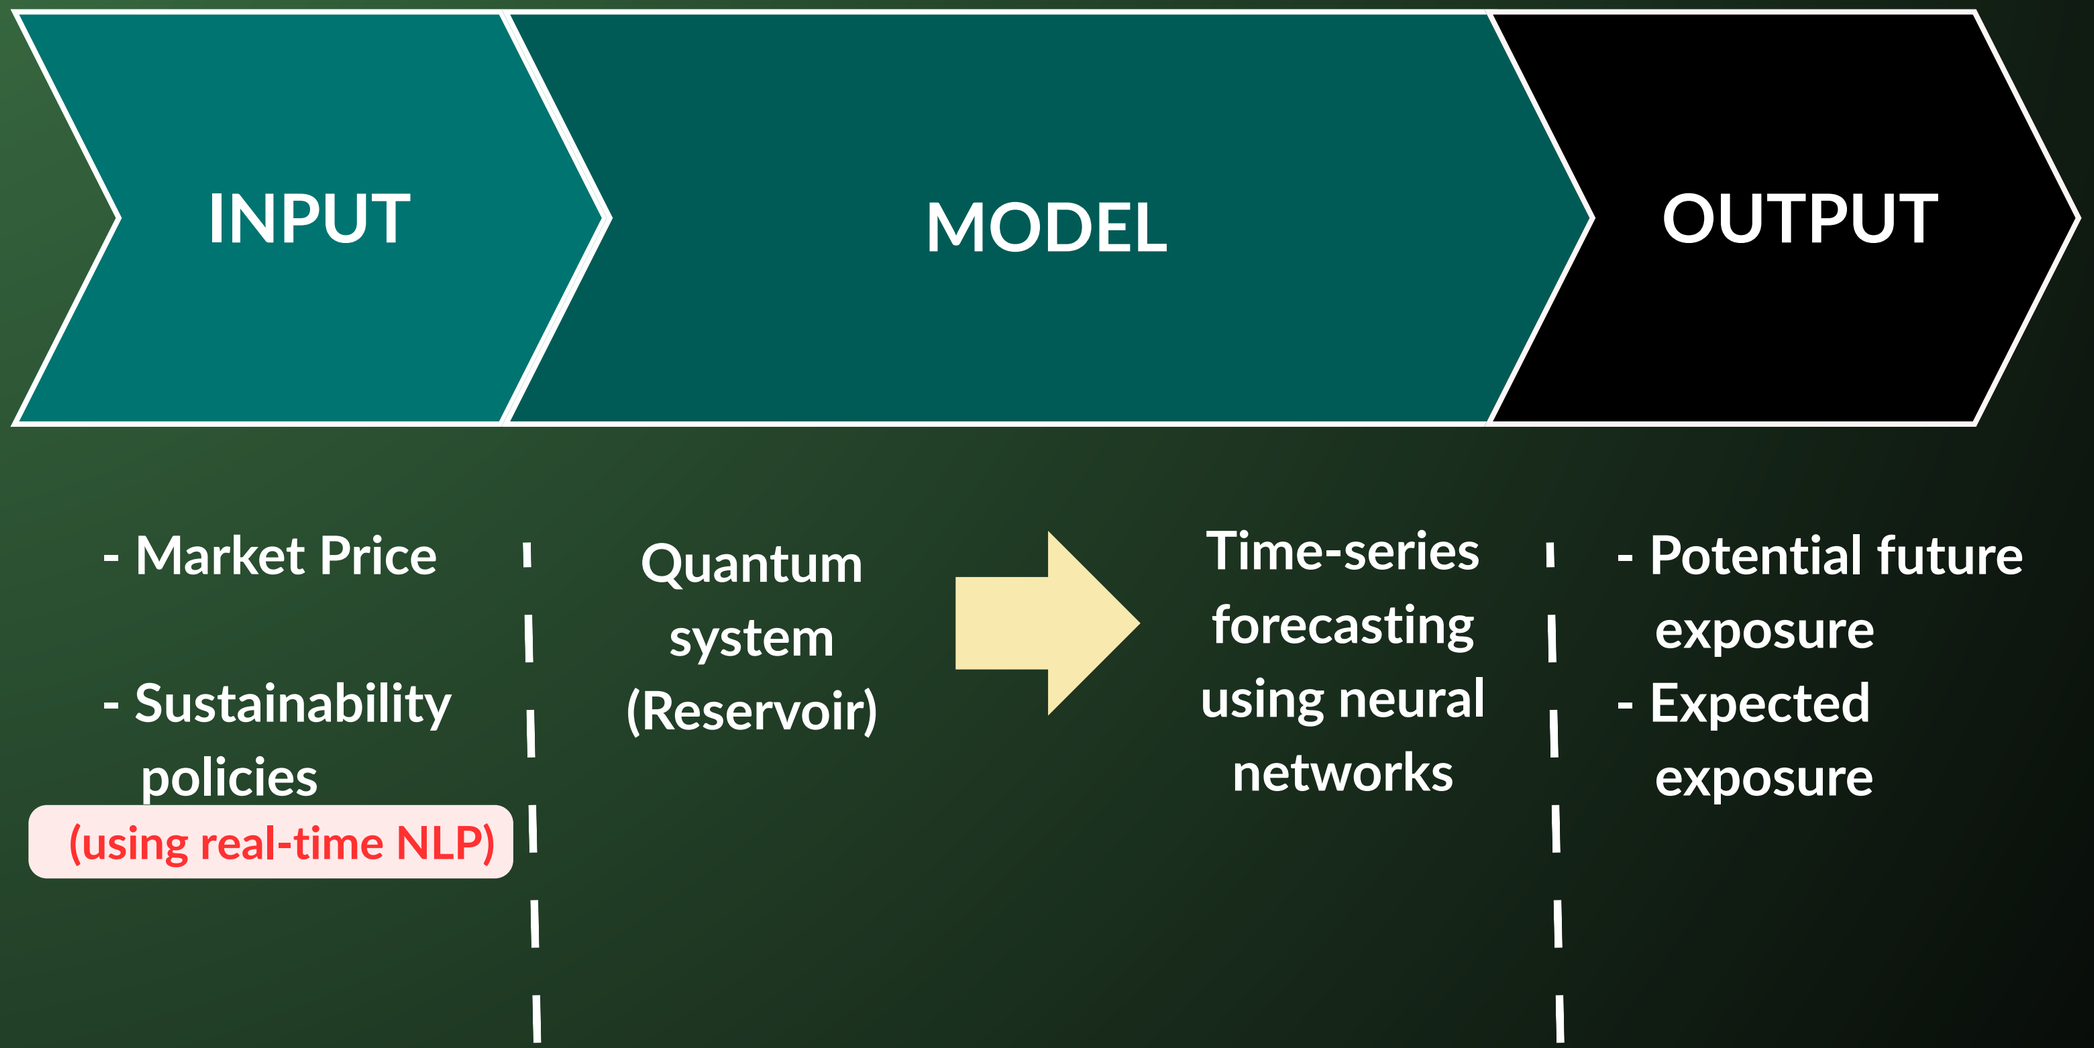
Quantum Hybrid Solution



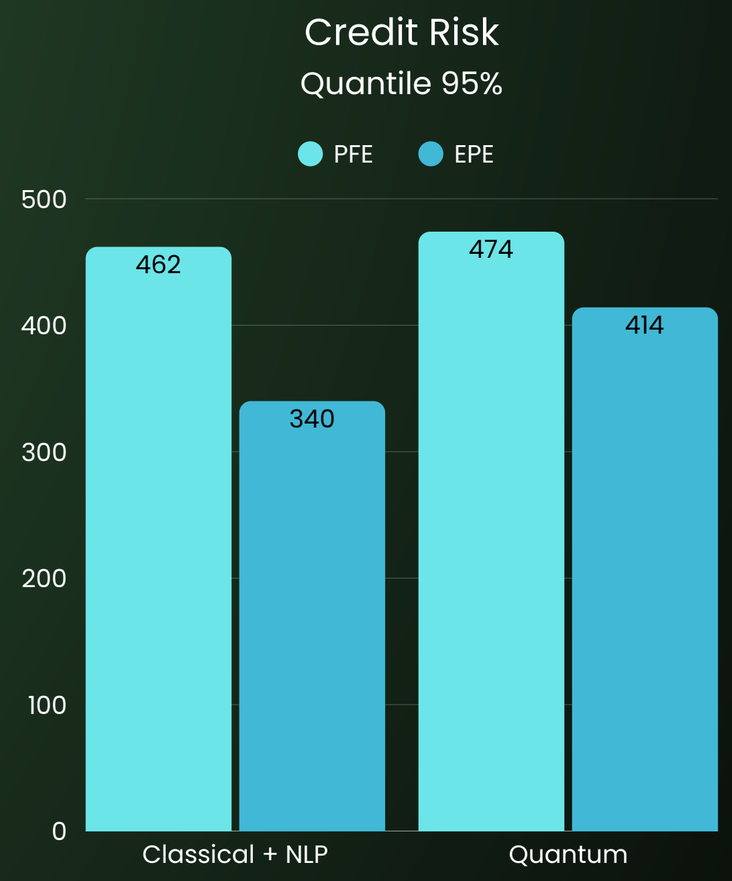
Quantum Advantage

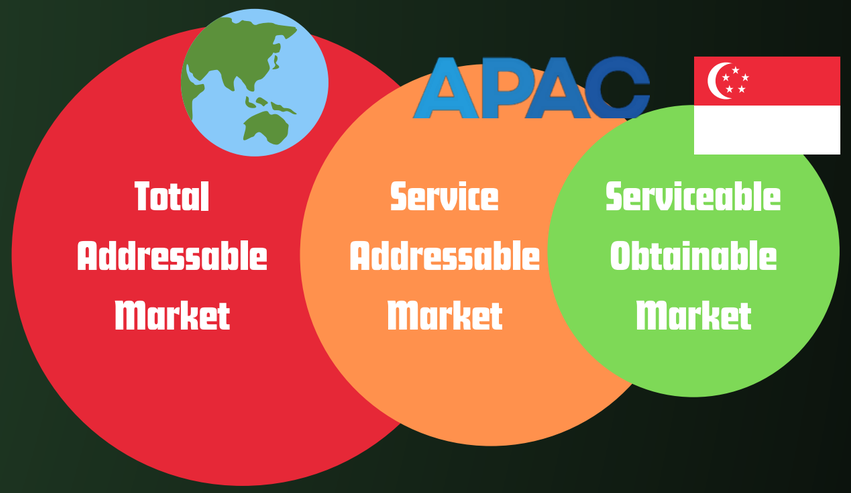
DYNAMIC CONTAGION MODELING

- Captures complex interdependencies
- Can model policy shocks without manual assumptions

ASSUMPTION-FREE FEATURE EXTRACTION

- No need to predefine weights, correlations, or functional forms
- Quantum evolution generates high-dimensional embeddings from raw market data





- Build prototype & benchmark against classical methods

- Expand to multi-counterparty in different countries
